Hinowa: technology and innovation to create advanced machines

Hinowa's products assure excellent performances, absolute reliability, safety and maximum competitiveness. The company is recognised leader in the design and production of compact, high performing machinery.

Hinowa SpA was founded in 1987 and places its origins on a long family tradition of construction equipment. From the outset the target was to develop machines on rubber tracks, creating applications on different fields, as agriculture, gardening, plant engineering, construction, shipbuilding and industry.

Hinowa has grown in a rapid way but managed to keep up with market trends and coming up with new ideas. The Italian and European markets absorb more than 80% of the Hinowa production while the American, Australian and Asiatic markets are growing.

Hinowa is located in Nogara, in the province of Verona and covers an area of 90,000 m² of which 27,000 are covered, with more than 160 employees. The in-house team of engineers, designers and specialized technician works in close partnership to develop new models from the design stage right through to the service life tests, which

simulate use of the machinery expected life cycle. Through this experience and expertise, **Hinowa creates safe, reliable and technologically innovative machinery** by carefully listening to the requirements of the market- hire companies, dealers and end users.

The Hinowa range includes products that are used in various fields, assuring excellent performances, absolute reliability, safety and maximum competitiveness:

- **Tracked aerial platforms** from 13.0 to 33.0 m working height
- **Tracked minidumpers**, different models with loading capacities from 400 kg to max. 2,500 kg
- **Tracked undercarriages**, capacity from 500 kg to 30,000 kg
- **Tracked forklifts** up to 2 tons of loading capacity
- **Tracked transporter TX2500**

The Italian company will attend Intermat 2018 in Paris with its own first-rate brand-truck: it also brings along the recent winner of the Intermat Innovation Award 2018.

The Italian company, which builds tracked aerial platforms, minidumpers,

pallet jacks and undercarriages, will arrive in France to show to guests a well-stocked selection of its equipment, including also the winning machine of a prestigious Award.

In the showroom, set up in **the wide Hinowa stand of 280 sqm (outside area E5, J016)**, the spotlight will definitely be focused on the **new Lightlift 33.17 Performance III S**, the platform that was able to win the Intermat Innovation Award 2018 on January 18th in the lifting, handling and transport categories. However, the group of platforms present at Intermat 2018 will be definitely numerous and it will also exhibit a large part of the Lightlift performance III S's family – with 26.14, 20.10, 17.75, 15.70, 13.70 models.

The same applies to the Minidumper range, represented in Paris by HS701 – dumper bed, self-loading, high-tip dumper bed models - HS400 self-loading and HS1103 swivel dumper bed.

Hinowa's welcome to the guests of the stand will focus on its brand-truck, the first-rate truck of Hinowa prepared to become a second company headquarters with offices, meeting rooms, lounge area and a kitchen where an Italian chef will prepare traditional dishes of the Veneto cuisine.
